Diprati Das

OBJECTIVE

A dedicated and aspiring Full Stack Web developer with a strong foundation in HTML, CSS, and JavaScript, complemented by ongoing learning and practical experience with frameworks such as Express.js and React.js. My journey into frontend development began from my passion for drawing and music, which has fueled my motivation to excel in this field alongside my academic pursuits. Aspiring to become a proficient software engineer, I am currently expanding my skill set by learning Python. Eager to gain practical experience and insight, I am actively seeking internships and freelancing opportunities to contribute to real-world projects and fulfill client needs while refining my skills and building a solid foundation for a successful career in software engineering.
